

AI-Suplex Simple Workflow Guide — Obsidian Macros Edition

AI-Suplex Simple Workflow Guide

TWABAM ⚡! This guide takes you from unzipping to your first completed session in 10 minutes. Follow each step in order.

Step 1: Unzip & Open

Unzip the file. You'll see:

```
7-7-7 Edition/  
├── .obsidian/      ← Plugin configs  
└── AI-Suplex-777/  ← Your product vault
```

Open the outer folder (`7-7-7 Edition/`) in Obsidian. Trust the 7 plugins when prompted.

Step 2: Add Your First Focus

A Focus is a work domain you want to track (e.g., Freelance, AI Engineering).

1. Open Command Palette (`Ctrl/Cmd+P`)
2. Type: `Focus Manager`
3. Add a focus — give it a name, display name, and description
4. Repeat for each area of your work

Your focuses appear in `Focuses.md`.

Step 3: Generate MOCs & Trackers

MOCs (Maps of Content) and Trackers are auto-populated dashboards that show your progress.

1. `Ctrl/Cmd+P` → Type: `Create MOC` — generates a dashboard per focus
2. `Ctrl/Cmd+P` → Type: `Create Tracker` — generates a progress tracker per focus

Open `MOCs/` and `Trackers/` to see them. They update automatically as you work.

Step 4: Start a Session

1. Click the  **Start** button in the left ribbon
2. Choose your **focus area**
3. Select **session type** (execution, planning, review, creative)
4. Pick **cycle** and **week**
5. Set your **energy level**
6. Write your **mission** and **tasks**

A session start file is created in `Sessions/Active/Start/`.

Step 5: Work & Capture

During your session, capture everything:

Macro	Button	What it saves
 Artifact	Ribbon	Work-in-progress with metadata
 Insight	Ribbon	Quick learnings (appends to weekly file)
 B-Bomb	Ribbon	Polished, reusable assets
 Feed CortexMem	Toolbar	Insights into persistent memory - see <i>Insights after</i>

Files are saved in `Artifacts/Cycle X/Week Y/` and `B-Bombs/Cycle X/Week Y/`.

Step 6: End the Session

1. Click  **End** in the left ribbon
 2. Rate your session (1-5)
 3. Note key insights and next actions
 4. The report is saved in `Sessions/Active/End/`
-

Step 7: Review Your Progress

Open `Command Center.md` — your live dashboard shows:

- Recent sessions with ratings
- Focus area health

- Latest B-Bombs and Artifacts
- Pending next actions

Run Enhance MOCs & Trackers before your weekly review to inject fresh data.

What's Next?

- **Weekly Review:** Run Sweeper – Weekly Review every Saturday
 - **Cycle Review:** Run Sweeper – Generate Cycle Review at the end of Week 7
 - **Deep Dive:** Read The AI-Suplex Workflow Pipeline.md for the full strategic pipeline and AI-Suplex-777/Guides/🦸 AI-Suplex Full Workflow Guide for full guide to the AI-Suplex workflow
 - *Try the Prompt Patterns approach, they are often quicker and easier in completing steps*
-

You're now running the 7-7-7 rhythm. Go capture your first session. 🦸⚡
